"Flower Seeds for Florists"

Geo. J. Ball
INC.
WEST CHICAGO

Paper Fights Too!

Because of the extremely important role that paper plays in keeping our fighting forces supplied with necessary materials of war, we are reducing the usual size of this catalog as part of our contribution toward the conservation of this essential material. In it you will find all of the important items usually sown during the summer and fall with the suggestion that our January catalog be referred to for a complete list of all Miscellaneous Annuals and Perennials.

Inasmuch as we grow our own seed of Forcing Snaps, Stocks, Primulas, Cinerarias, Calceolarias and Begonias—and because we are growers ourselves—we are in a particularly fortunate position to supply exactly the strains that florists need. Should shortages of some varieties develop we will substitute with kinds equally as good unless instructed otherwise. Early ordering will help avoid possible disappointment.

BALL NON-BRANCHING STOCKS

(18,000 seeds per ounce)

Ease of growth, less labor in their production than most crops require, combined with their general excellence when well grown, explain the increasing demand we are finding for our fine scientifically-bred strains of Non-branching Stocks—and we challenge anyone to produce better. Our monthly GROWER TALKS will keep you posted on all details of their culture.

In spite of conditions brought on by the war, we furnished growers with more of this seed last year than ever before. Knowing that the demand will be even greater this year, we have made every effort to produce ample seed. However, wise growers are protecting themselves by anticipating their needs and ordering early.

PRICES On All Non-Branching Varieties As Follows: ½ Tr. pkt., 60c; Tr. pkt. (about 1,200 seeds), \$1.00; ¼ oz., \$2.50; 1 oz., \$9.00.

PRIZEWINNERS!

If you want the three finest varieties and colors on the entire list, here they are! Flower markets the country over, say they can't be beat.

***No. 15 Ball White Improved.** This is our new reselected strain resulting from a cross between Ball White No. 16 and the original strain of No. 15 with the pure white closely set spikes of No. 16 and the long sturdy stems of No. 15; a combination that will appeal to most growers. **Trade Packets and ¼ ounces only** until September.

***No. 1 Lilac Lavender.** Second only in popularity to Ball White. Our own excellent large flowered strain that is well liked by all markets.

***No. 22 Ball Supreme.** Extra long stiff stems and fine heavy spikes of rich silvery rose have made this the outstanding variety in its color class.

WHITE VARIETIES

***No. 16 Ball White Improved—Medium Tall.** Entirely non-branching with extra large florets and heavy compact spikes of snowy whiteness. A few days earlier than our No. 15. **Trade Packets and ¼ ounces only** until Sept.

No. 5 Ball White Extra Dwarf. The extra dwarf (12 to 14 in.) habit and compactly formed pure white spikes of this new type suit it well for pot plant use. Properly grown it resembles a large white Hyacinth. Richly fragrant.

Gardenia. Long stemmed and pure white, but not entirely non-branching. One of the latest flowering varieties.

PINK, ROSE AND RED VARIETIES

No. 11 Ball Pink. A medium light rose pink. Earlier and somewhat lighter than our No. 22, but not quite as long stemmed.

***No. 14 Ball Rose Pink.** An early flowering fairly deep rose pink. Darker in color and longer stemmed than the above variety.

No. 9 Chamois Pink Improved. A warm rosy buff color. Distinctly improves the original stock of this variety in stem length and percentage of doubles.

Flowers from our Easter cut of Ball Stocks. No. 16, 22 and 15.

No. 7 Malmaison Pink. Extra long-stemmed blush pink, with some tendency to branch at the base of the flower spike. Useful in combination with darker varieties.

No. 6 American Beauty. Rich deep American Beauty or carmine rose. An appealing but rather heavy color.

No. 8 Ruby. Long-stemmed, glowing crimson red. Plant moderately of this rather strong color for market use.

LAVENDER, BLUE AND PURPLE VARIETIES

No. 3 Ball Blue. A medium lavender mauve identical in habit to Lilac Lavender. A moderate amount of this is usually wanted.

***No. 21 Ball Purple.** Bright Elk's Pride Purple, long stemmed and extra early. A bold and striking color that blends well with Apricot and pale ivory yellows.

WINTER PEAS

(350 Seeds per oz.)

Due to the smaller quantities of Winter Peas being generally grown during the War, the grower in a position to do so will find them quite profitable today. We find that they must be grown in sterilized soil and sown early enough to get the vines hardened sufficiently to hold buds for winter flowering; with us this is early July. Approximately a week later should be figured for each 200 miles further south.

OUR TWELVE BEST

(For Mid-Winter)

Although we realize that no list of "best" varieties will prove completely satisfactory in all localities, our own growing experience plus seed sales indicate that the following twelve constitute the very cream of today's finest.

Christmas Cheer. Without question the finest and most profitable extra early rose pink; should be grown on a raised bed for best spike development. We offer originator's packets only. Tr. pkt., \$2.00.

Better Times. Compact, closely set spikes of rich, glowing American Beauty rose; to insure good stem length, should not be grown too cold. We offer originator's packets only, subject to delivery of new crop seed. Tr. pkt., \$2.00.

Cheviot Maid Reselected (Ball). Our own strain of this ever-popular variety is practically 100% true to its medium rose pink color and uniform, clean habit of growth. Tr. pkt., \$1.00.

Peggy Schumann. Extra fine, creamy rose pink with heavy stiff stems and well formed spikes. This truly fine variety is steadily increasing in popularity. Tr. pkt., \$2.00.

Mary Ellen. We have been assured of a fairly good supply of new crop seed of this highly popular silvery pink Snap. We handle only originator's packets. Tr. pkt., \$2.00.

Maryland Pink. Well formed spikes of soft pastel pink borne on stiff stems make this an outstandingly fine variety. Exceptionally clean and uniform in growth. Originator's packets. 1/2 tr. pkt., \$1.25; Tr. pkt., \$2.00.

White Wonder Improved (Ball). Our own uniformly long stemmed, even growing strain of this pure white variety. A few days later than Koester's White, but considerably stronger in growth. Tr. pkt., \$1.50.

Koester's White. Fine, early flowering pure white; sufficiently long stemmed for most purposes. Well formed attractive spikes. Tr. pkt., \$1.50.

Ethel. The most satisfactory fairly deep yellow that we know of. Perfectly uniform in habit without grassy side growth and with medium sized closely set spikes. Tr. pkt., \$1.50.

Afterglow. All points considered, this still continues to be the most generally satisfactory all-around orange bronze. Clean growing and attractive. Tr. pkt., \$1.00.

Ball Lavender. Long stemmed and strong growing with long heavy spikes of pleasing orchid lavender. A ready seller on most markets. Tr. pkt., \$1.50.

Ball Supreme Red. (Formerly Velvet Supreme.) We have changed the name of our popular velvety, scarlet crimson to avoid disappointment resulting from confusion with Velvet Beauty that our trials have always shown to be more or less mixed. We have a good supply of our own growing of this fine strain. Tr. pkt., \$1.50.

Ball Forcing Mixture. Carefully balanced mixture of these 12 best varieties. Tr. pkt., \$1.00.

Forcing Snaps

(2000 Seeds
